

60kW Three-Phase Silent Diesel Generator

This 60kW three-phase generator is designed for silent operation. It operates at both 50Hz and 60Hz frequencies, providing flexibility for different power grids.

Overview

High-Reliability 60kW Silent Diesel Generator

This three-phase silent diesel generator is engineered for continuous running and high reliability, drawing on a long heritage of engine technology. It features a water-cooled engine design and a sound-attenuated housing to ensure quiet operation in noise-sensitive environments. With a built-in 8-hour fuel tank and anti-vibration mounting, it provides a stable and efficient power source for various professional applications.

Core Performance

Rated Power

60 kW

Power Output

Phase: Three-Phase

Supported Frequencies: 50Hz, 60Hz

Engine & Alternator

Engine Characteristics

- Fuel-efficient design
- Small footprint
- Low noise operation
- High durability for continuous running

Alternator Compatibility

Original Stamford • Leroy Somer • Mecc Alte

Cooling System: Water-cooling

Construction & Design

Base Construction

- Steel base fuel tank
- Anti-vibration mounting
- Build-in tank for daily use

Operation Time

8 hours

Control & Safety

Digital Control Modules

Deepsea, ComAp, Smartgen

Circuit Breaker Options

Standard CHINT/DELIXI or optional ABB breaker

Included Accessories

Standard Equipment

- Muffler exhaust system
- Free-maintenance battery
- Flexible fuel lines
- Lube oil, fuel & water drain cocks
- User's manual

Logistics

Packing Method

Shrink wrap or wooden box
