

60kW Three-Phase Solar Inverter with Six Inputs

This 60kW solar inverter is designed for three-phase power systems. It features six independent input channels for flexible solar panel configuration and maximum energy harvesting.

Product Overview

Professional Commercial Solar Inverter

This high-efficiency 60kW solar inverter is engineered specifically for three-phase power systems, making it an ideal choice for commercial and industrial energy projects. Featuring six independent input channels, it offers superior flexibility for complex solar panel array configurations to maximize energy harvesting. Its robust construction ensures long-term reliability and durability even in demanding environmental conditions.

Technical Specifications

Rated Power

60 kW

Power Output

Independent Input Channels	6
Phase Configuration	Three-Phase

Physical Characteristics

Physical Dimensions

Dimension Type	Value
Height	850mm
Width	290mm
Depth	30mm
Weight	58 kg

Features

Application Compatibility	Commercial, Industrial, Grid-tied
