

60M Digital Laser Distance Meter with Level

This laser distance meter accurately measures distances up to 60 meters. It features a digital display, multiple measurement functions, and an integrated level for precision.

Overview

Professional Precision Measurement

This digital laser distance meter is a precise and reliable tool designed for measuring distances up to 60 meters. It features an intuitive interface with dedicated buttons for addition, subtraction, and unit selection, making complex calculations effortless. Equipped with a built-in level, it ensures accurate horizontal measurements for construction, surveying, and professional indoor or outdoor applications.

Technical Specifications

Maximum Measuring Range

60 m
Max Distance

Key Features

- Integrated digital level
- Addition and subtraction calculation functions
- Unit selection capability
- Clear digital display with historical measurement tracking

Control Interface

Button Function	Description
ON	Power on/Measurement trigger
OFF	Power off
UNIT	Toggle measurement units
CLEAR	Reset or clear data
+ / -	Calculation functions

Typical Applications

Construction, Surveying, Indoor Projects, Outdoor Measurement
