

60M Laser Distance Measurer

This laser distance measurer is designed for accurate and reliable distance measurements up to 60 meters. It features a compact design, clear LCD display, and multiple functions including area, volume, and Pythagorean calculations.

Overview

Precision Measurement Solution

This laser distance measurer is a precision instrument designed for accurate and reliable distance measurements in professional environments. It features a compact and ergonomic design with a clear LCD display for easy reading. The device offers a versatile range of measurement functions including single distance, continuous measurement, area, volume, and Pythagorean calculations, making it suitable for various indoor and outdoor applications.

Technical Specifications

Working Range	60 m
Minimum Range	0.05 m
Measurement Accuracy	±2mm
Laser Class	Class 2, 635nm

Features

Measurement Modes

- Single Distance
- Continuous Measurement
- Area Calculation
- Volume (Cube) Calculation
- Pythagorean Theorem
- Cumulative Calculation

Durability

Dust Resistant • Splash Resistant

Usability Features

Bubble Level, Memory Storage, Unit Conversion, Front/Back Edge Measurement
