Product Overview

Description

Technical overview of the HFJ140 60mm customized mechanical cartridge seal.

High-Performance Mechanical Cartridge Seal

The HFJ140 60mm Mechanical Cartridge Seal is an engineered solution designed for demanding industrial environments. Featuring a robust construction with high-quality materials, it provides superior sealing effects, low friction, and excellent wear resistance. Its cartridge design allows for easy replacement, minimizing downtime and ensuring consistent operational efficiency across various applications.

Key Features

Product Highlights

Wear Resistant, Superior Sealing, Low Friction, Easy Replacement, Customized Mold, Quality Management System

Technical Specifications

Robust construction designed for high-performance industrial sealing applications.

The cartridge design simplifies installation and maintenance, reducing system downtime.

Operating Pressure

1.2 Mpa

Max Pressure

Typical Applications

- Bus Systems
- Construction Machinery
- General Industrial Pumps
- Submersible Pumps
- Marine Pumps

Model Number	Cartridge J140
Shaft Diameter	60 mm
Material Composition	S.S / SUS304 / HNBR
Speed Rating	3000 rpm

Services & Support

Service & Customization

- ODM Service Available
- OEM Service Available
- Free technical drawings with mass production
- Video technical support
- 1-year quality guarantee
