

60V 20AH Lithium Battery for Electric Vehicles

This lithium battery delivers strong power for various applications. It is commonly used in electric vehicles, sightseeing cars, golf carts, and garbage trucks.

Overview

High-Performance Lithium Power Solution

This 60V 20AH lithium battery is engineered for space-efficiency and portability, making it an ideal power source for electric vehicles and renewable energy systems. It features advanced built-in protections against overcharge, over-discharge, and temperature fluctuations to ensure safety and longevity. With a lightweight design and easy-replacement functionality, this battery provides reliable, long-cycle performance for demanding energy applications.

Technical Specifications

Voltage	60 V
Capacity	20 AH

Safety & Features

Usability Features

- Lightweight design
- Compact footprint
- Indicator light included
- Easy to replace

Protection Features

Overcharge Protection, Over-discharge Protection, Over-current Protection, Temperature Protection

Performance Metrics

Core Performance
