Setup & Usage

Optimizing Your Sound

For the best bass performance, place the subwoofer on the ground. If you wish to strengthen the ultra-bass effect, position the inverted phase hole toward a wall, maintaining a distance of 5-10cm. For optimal stereo imaging, ensure the main speakers are aligned with the user's axis and positioned at ear height, ideally within 1.5 meters.

Interface

Control Panel Features

Control Type	Function
Playback	Play, Pause, Next, Scan
