

60W Electric Soldering Iron with Pointed Tip

This 60W electric soldering iron is designed for professional welding tasks. It features a durable construction with a stainless steel barrel, a blue plastic handle for comfortable grip, and a pointed tip for precise soldering.

Overview

Professional Soldering Performance

This 60W electric soldering iron is engineered for professional welding tasks requiring precision and reliability. Featuring a high-quality stainless steel non-magnetic heat sink and a ceramic heating core, it ensures consistent heat delivery for high-performance applications. The design focuses on thermal insulation and user comfort, making it an ideal tool for electronic and electrical assembly work.

Technical Specifications

Power Rating	60 W
Heating Element	Ceramic heating core
Tip Type	Pointed

Construction

Insulation Features

High Performance Heat Insulation • Non-magnetic Heat Sink

Material Composition	Stainless Steel, Non-magnetic, Plastic
Model Identifier	XLD-90303
