

60W Portable Foldable Solar Panel Charger

This 60W solar panel is a portable and foldable charger for outdoor activities and emergency power. It features high-efficiency solar cells laminated in a durable, weather-resistant fabric.

Overview

High-Efficiency Portable Power

This 60W foldable solar panel is designed for professional outdoor use and emergency power backup, featuring high-efficiency monocrystalline cells that convert up to 23% of sunlight into usable energy. It offers versatile charging options through integrated USB-A, USB-C, and DC outputs, making it compatible with both small mobile devices and larger portable power stations. The rugged, waterproof design includes integrated kickstands for optimal sun positioning and folds into a compact bag for easy transport.

Electrical Specifications

Output Parameters

Port Type	Voltage/Current Specs
DC Output	18V / 3.3A Max
USB-A Output	5-12V / up to 3.4A Max
USB-C Output	5-12V / up to 3.1A Max

Physical Design

Solar Cell Type	Monocrystalline (3 pieces)
Dimensions (Unfolded)	1285 x 410 x 30 mm
Dimensions (Folded)	410 x 370 x 45 mm
Net Weight	2.85 kg

Features

Weather Resistance

Waterproof • Splash Resistant

Key Features

- Integrated kickstands for angle adjustment
- Foldable bag design with carry handle
- Direct charging for mobile devices
- Compatible with solar generator systems

Accessories

What's in the Box

- 1x User Manual
- 1x 1.5m Anderson 30A Cable
- 1x 3m Anderson 30A to MC4 adapter
- 1x 3m Anderson 30A to 8mm DC adapter
