

60W Portable Solar Power and Lighting System

The 60W Solar System provides a portable and efficient solution for off-grid power and lighting. This system includes a solar panel for charging, a central power unit with multiple output ports, and several LED bulbs for illumination.

Product Overview

Portable Energy Solution

This 60W portable solar power and lighting system provides a reliable, off-grid energy source for domestic use or emergency situations. Featuring both AC and DC operation capabilities, the unit ensures flexibility in charging and power delivery. The system is designed for mobility and ease of use, including an integrated battery and multiple lighting components for immediate illumination.

Technical Specifications

Solar Panel Power

10 W

Solar Panel Output

15 V

Solar Panel Voltage

Battery Capacity

7000 mAh

System Voltage

12 V

Lighting & Accessories

LED Units Included

5

Features

Recommended Use

Off-grid • Emergency Backup • Camping • Home Lighting

Operating Modes

AC Operated, DC Operated, Solar Charging, Portable
