

6/12V 18A Battery Charger with Floating Function

This is a battery charger with 6/12V and 18A output. It features an automatic floating function and includes battery clamps and a power cord.

Product Overview

Professional Battery Charging Solution

This versatile battery charger is designed for efficient 6V and 12V battery maintenance and charging. Featuring an automatic floating function, it ensures batteries are kept at optimal charge levels without the risk of overcharging. With a robust 18A output capacity, it is well-suited for demanding battery charging applications in professional environments.

Technical Specifications

Charging Mode

Automatic Floating

Output Voltage

6V, 12V

Maximum Current Output

18 A

Included Accessories

Included Components

- Battery clamps
- Power cord
