

61908 Deep Groove Ball Bearing

This deep groove ball bearing is designed for high-speed applications. It is capable of handling both radial and axial loads.

Overview

High-Performance 61908 Deep Groove Ball Bearing

The 61908 deep groove ball bearing is engineered for high precision and extended service life in demanding industrial environments. Constructed from high-quality bearing steel, it offers smooth, efficient operation suitable for both radial and axial loads. This versatile component is widely utilized across sectors including automotive, railways, and construction machinery.

Technical Specifications

Retainer Material

- Copper
- Nylon
- Bakelite
- Stainless Steel

Bore Diameter Range

1mm - 1800mm

Precision Level

P4, P5, P6, P0, ABEC7, ABEC5, ABEC3, ABEC1

Material

GCr15, SiMn

Features & Quality

Key Features

Low Noise • Long Life • High Precision

Quality Standards

ISO9000

Applications

Suitable Applications

- Machine tools
- Electrical equipment
- Railways
- Automotive
- Construction machinery
