Product Overview

630W Rotary Light Dimmer

This rotary dimmer switch is designed for precise control over the intensity of compatible lighting fixtures, offering smooth and flicker-free dimming for both residential and commercial applications. Engineered with high-quality, fire-retardant ABS material and silver alloy contactors, it ensures both safety and reliable conductivity. Its versatile design allows for easy installation in standard wall boxes, making it an ideal choice for modern interior architecture.

Technical Specifications

Maximum Power Rating

630 W
Max Power

Article Number

ART.NO.E328L

Voltage Rating

250 V

Construction & Materials

Design Features

- Wall protection design to prevent surface damage during installation
- Optimized cord hole for quick and easy assembly
- Brief, modern aesthetic suitable for various architectural styles
- Silver alloy contactor for improved conductivity

Key Materials

Fire Retardant ABS, Full Copper, Silver Alloy
