

63A 2-Pole Isolator Switch 230/400V

This 63A isolator switch is designed for 230/400V systems at 50/60Hz. It provides a reliable means to disconnect circuits for maintenance or safety in residential and commercial applications.

Overview

Reliable Electrical Isolation

This 2-pole isolator switch is engineered for high-performance electrical isolation in residential, commercial, and industrial environments. Rated for 63A and compatible with 230/400V systems, it provides a safe and reliable method for disconnecting circuits during maintenance or emergency procedures. The unit is designed to handle AC 50/60Hz frequencies, ensuring compatibility with standard power distribution networks.

Technical Specifications

Rated Current

63 A

Rated Current

Rated Voltage	230/400V AC
Operating Frequency	50/60Hz
Pole Configuration	2-Pole
Terminal Capacity	0.5 - 25mm ²

Compliance & Standards

Compliance Standards	IEC/EN60898-1, IEC/EN60947-5
----------------------	------------------------------

Features

Suitable Applications

- Residential electrical systems
- Commercial building distribution
- Industrial equipment isolation
- Lighting circuit control
