

63A Switch Disconnecter

Switch disconnectors are engineered for electrical isolation and circuit protection. Rated at 63A, they are suitable for 230/400V AC-22A applications and compliant with IEC 60947-3.

Overview

Reliable Electrical Isolation

This 63A switch disconnector is engineered for secure electrical isolation and circuit protection in demanding environments. Designed for compatibility with 230/400V AC-22A applications, it ensures robust performance and safety. The unit features clear ON/OFF visual indication, making it an essential component for reliable power management systems.

Technical Specifications

Rated Current

63 A

Rated Current

Voltage Rating	230/400V
Utilization Category	AC-22A
Model Number	3SB71G-125

Compliance & Safety

Standards Compliance	IEC 60947-3, CE
----------------------	-----------------

Features

Key Features

- Clear ON/OFF indication
- Robust design for reliable performance
- Electrical isolation capabilities
- Circuit protection
