

6/4 D-H Slurry Pump for Abrasive Materials

This slurry pump is designed for handling abrasive and high-density slurries, as well as low-density, high-head slurries. It is suitable for use in industries such as metallurgy, mining, coal, power, and building materials.

Overview

High-Performance Centrifugal Slurry Pump

The 6/4 D-H slurry pump is a robust centrifugal unit engineered for handling highly abrasive and high-density slurries. Designed for demanding industrial environments, it excels in metallurgy, mining, coal, and power generation applications. This pump features a durable, heavy-duty construction that supports multi-stage series installation for increased head capacity.

Performance Metrics

Maximum Flow Rate

100 L/sec

Max Flow

Maximum Head

56 Meters

Max Head

Technical Specifications

Suction Size	6 inch
Discharge Size	4 inch
Liner Material Options	High chrome, Rubber

Dimensions

Dimensions (L x W x H)	1021 x 812 x 668 mm
------------------------	---------------------

Applications

Suitable Industries

- Metallurgy
- Mining
- Coal
- Power
- Building Materials
