

# 6.5" Car Audio Component Speaker with Paper Cone Woofer

This 6.5-inch component speaker is designed for car audio systems. It features a 160W power handling capacity and a pressed paper cone woofer.

## Overview

### High-Performance 2-Way Component System

This 6.5-inch 2-way component speaker system is engineered for superior audio clarity and dynamic sound reproduction in automotive environments. Featuring a durable pressed paper cone woofer and a precision 1-inch silk dome tweeter, it delivers a balanced and immersive listening experience. With a robust 160W peak power handling and efficient frequency response, this system is an ideal upgrade for professional car audio installations.

## Audio Performance

### Power Handling

**80 W**

RMS Power

**160 W**

Peak Power

Frequency Response: 60-20000 Hz

Sensitivity (SPL): 92 dB

## Woofer Details

Cone Material: Pressed Paper

Voice Coil Type: 1-inch ASV

## Tweeter Details

Tweeter Material: Silk Dome

Magnet Type: Neodymium

## Technical Specifications

Impedance: 4 Ohm

Crossover Configuration: 12dB/Oct (3.5kHz)

Magnet Size: 85mm (14 Oz)
