

6.5 HP Electronic Ignition Engine

This 6.5 HP electronic ignition engine features electronic ignition. Its compact design and oil alert system ensure reliable power for generators, water pumps, and other equipment.

Product Overview

Reliable Power Source

This 6.5 HP single-cylinder, air-cooled engine is designed for versatility and durability in demanding environments. Featuring an integrated electronic ignition system and an oil alert safety function, it ensures consistent performance and engine protection. Its compact design makes it an ideal power solution for portable equipment such as generators and water pumps.
