

6.5 HP Gasoline Engine with OHV Design

This compact gasoline engine features a 6.5 HP power rating and an overhead valve (OHV) design. It includes an air filter, electronic ignition, and a fuel tank with safety warnings for reliable starting and engine cleanliness.

Product Overview

Robust 6.5 HP OHV Gasoline Engine

This 6.5 HP gasoline engine features a reliable Overhead Valve (OHV) design, engineered for durability and efficient power delivery. Equipped with an integrated air filtration system and electronic ignition, it ensures consistent performance and easy starting for various power equipment applications. The compact construction makes it a versatile choice for professional machinery requiring dependable, high-output power.

Technical Specifications

Power Rating

6.5 HP

Horsepower

Engine Design

OHV • Air-Cooled

Model Number

168FB

Maintenance & Safety

Safety Instructions

- Check oil level before operating
- No smoking near fuel tank
- Refer to manual for specific instructions

Air Filter Maintenance

Clean filter every 50 hours of use

Ignition System

Electronic Ignition
