

650W Electric Impact Drill Driver with 13mm Chuck

This electric impact drill driver is equipped with a 650W motor, ensuring high performance and efficiency. It features a 13mm chuck capacity and an impact function suitable for drilling into hard materials like concrete and masonry.

Overview

Professional Impact Performance

The 650W Electric Impact Drill Driver is engineered for versatility and high-performance drilling across a variety of materials. Featuring a robust 650W motor and a 13mm chuck capacity, it easily accommodates a wide range of drill bits for precise fastening and drilling tasks. The integrated impact function significantly enhances capability when working with hard surfaces like concrete and masonry, making it an essential tool for professional job sites.

Technical Specifications

Input Power

650 W

Power Rating

Voltage Compatibility	110-120V, 220-240V
Frequency	50/60Hz

Performance

Suitable Applications

- Drilling into concrete
- Masonry work
- General fastening
- General drilling

No-load Speed	2800 rpm
Chuck Size	13 mm
