

65cm Offset Satellite Dish Antenna

This Ku band 65cm offset satellite dish antenna is designed for strong signal reception. It features a robust mounting design suitable for various installation environments.

Product Overview

High-Performance Satellite Reception

This 65cm offset satellite dish antenna is engineered for reliable Ku-band signal reception, featuring a precision-designed offset angle of 23.02 degrees to minimize signal blockage. Built with durable materials like steel, galvanized steel, or aluminum, it ensures long-lasting performance in various outdoor environments. Its versatile mounting options and robust construction make it an ideal choice for both residential and commercial satellite TV installations.
