

# 6.5in 280W Car Speaker

This car speaker has a 165mm/6.5in nominal diameter and provides a max output power of 280W. It features a 4 $\Omega$  nominal impedance and a sensitivity of 93dB.

## Product Overview

### High-Performance 4-Way Car Audio

This 6.5-inch 4-way car speaker is engineered to deliver robust audio performance with a maximum output power of 280W. Designed for clarity and durability, it features a PP injection cone and rubber surround for consistent sound reproduction across a wide frequency range. Ideal for automotive audio upgrades, this unit combines efficient power handling with high sensitivity for an immersive listening experience.

## Audio Performance

### Max Output Power

**280 W**

Max Output Power

**93 dB**

Sensitivity

Frequency Range	65Hz - 20kHz
Nominal Impedance	4 $\Omega$

## Physical Dimensions

Nominal Diameter	6.5 in
Magnet Dimensions	80 x 15 mm
Magnet Weight	10 oz

## Components

### Component Materials

Component	Material
Coil	Copper
Former	Aluminum
Cone	PP Injection
Surround	Rubber

Voice Coil Diameter	1 in
