

# 65kW Diesel Power Generation Unit

This 65kW diesel power generation unit delivers reliable and efficient power. Its compact design ensures easy installation and maintenance for prime and standby power applications.

## Overview

### Reliable Power Generation

This 65kW diesel power generation unit is engineered for consistent and efficient performance in both prime and standby applications. It pairs a robust diesel engine with a high-performance alternator to deliver stable power output. Designed for ease of use, the unit includes an integrated control panel with comprehensive monitoring gauges and safety protective devices.

## Technical Specifications

### Rated Power Output

**65 kW**

Rated Power

### Key Features

- Robust diesel engine
- High-performance alternator
- Integrated cooling system
- Comprehensive control panel

## Operational Details

### Safety & Monitoring

Monitoring Gauges • Protective Devices • Stable Output

### Suitable Applications

Prime Power, Standby Power

### Design Advantages

Compact design facilitates easy installation and simplified maintenance procedures.
