

67.2V 10A Lithium-Ion Battery Charger for Electric Vehicles

This lithium-ion battery charger provides a 67.2V output at 10A, suitable for 16S 60V battery packs commonly found in electric motorcycles and scooters. Its robust aluminum casing ensures efficient heat dissipation, while the built-in cooling fan manages temperature during charging.

Overview

High-Performance EV Charging Solution

This 600W battery charger is engineered for reliable performance in electric vehicle applications, including motorcycles, scooters, and e-bikes. Designed with a durable aluminium alloy casing, it ensures efficient heat dissipation during operation. It supports a wide range of battery chemistries, including Li-ion, LiFePO4, and lead-acid, making it a versatile choice for various power systems.

Technical Specifications

Output Power

600 W

Output Power

67.2 V

Output Voltage

10 A

Output Current

Input Voltage Range	110-132VAC / 200-264VAC
----------------------------	-------------------------

Compatible Battery Types	Li-ion, LiFePO4, Lead-acid
---------------------------------	----------------------------

Physical Attributes

Dimensions	173 x 90 x 63 mm
-------------------	------------------

Net Weight	1.1 kg
-------------------	--------

Casing Material	Aluminium Alloy
------------------------	-----------------

Compliance & Support

Certifications

CE

Common Applications

- Electric Motorcycle
- Scooter
- E-bike

Warranty Period

12 Months
