Overview

High-Efficiency Charging Solution

This 300W battery charger is engineered for reliable performance in electric mobility applications, including e-bikes, scooters, and electric motorcycles. Featuring a durable aluminium alloy construction, it provides stable power output for various battery chemistries. Designed with international versatility in mind, it supports multiple input voltage ranges and offers customizable socket standards to meet regional requirements.

Performance & Power

Core Power Metrics

300 W

Output Power

4 A

Charging Current

67.2 V

Output Voltage

Supported Battery Types Li-ion, LiFePO4, Lead Acid

Input Voltage 110-132VAC / 200-264VAC

Physical Specifications

Dimensions 137 x 90 x 51 mm

Net Weight 1 kg

Housing Material Aluminium Alloy

Logistics & Compliance

Certifications

CE

Warranty Period

12 Months

Country of Origin

China

Applications

Recommended Applications

- Electric Motorcycles
- Electric Scooters
- E-bikes
