

# 67.2V 5A Lithium-Ion Battery Charger for E-bikes

This charger is designed for 67.2V lithium-ion batteries, commonly used in e-bikes. It features LED indicators for charging status and includes safety warnings.

## Product Overview

### High-Efficiency Charging Solution

This C600 battery charger is engineered for reliable performance with electric motorcycles, tricycles, and various e-vehicles. Featuring a robust aluminum alloy housing, it ensures efficient heat dissipation and durability in demanding environments. With a maximum efficiency of 91%, it provides a stable and safe power delivery for diverse battery chemistries including Li-ion, LiFePO4, and lead-acid.

## Technical Specifications

|                          |                            |
|--------------------------|----------------------------|
| Input Voltage            | 200-240V or 100-120V       |
| Output Voltage           | 67.2 V                     |
| Output Current           | 5 A                        |
| Maximum Efficiency       | 91 %                       |
| Compatible Battery Types | Li-ion, LiFePO4, Lead Acid |

## Physical Attributes

|                  |                  |
|------------------|------------------|
| Dimensions       | 173 x 90 x 51 mm |
| Net Weight       | 0.8 KG           |
| Housing Material | Aluminum alloy   |
| Color            | Black            |

## Operational Features

### Status Indicators

- Red: Charging
- Green: Fully Charged

### Primary Applications

E-bikes • Electric Motorcycles • Electric Tricycles
