

68kW Diesel Generator Set

This 68kW diesel generator set is designed for reliable power generation across various applications. It incorporates a durable diesel engine and a high-efficiency alternator, complete with a control panel for monitoring key parameters.

Overview

Professional Power Generation

This 68kW diesel generator set is engineered for consistent and reliable power delivery across diverse operational environments. Built on a heavy-duty steel frame, it integrates a high-efficiency engine and alternator to ensure structural stability and reduced vibration. Designed with serviceability in mind, the unit includes comprehensive monitoring systems to track critical performance metrics, making it an ideal choice for demanding industrial applications.

Technical Specifications

Rated Power Output

68 kW

Rated Output

Core Systems

- Diesel Engine
- High-Efficiency Alternator
- Integrated Cooling System
- Fuel System
- Lubrication System
- Exhaust System

Control and Monitoring

Performance Parameters

Voltage, Current, Frequency, Engine Performance

Construction

Design Features

Heavy-duty Steel Base • Vibration Isolation • Easy Maintenance Access
