

6kW Triple-Phase Solar Inverter with WiFi/GPRS

This 6kW triple-phase solar inverter is designed for solar power systems. It features WiFi/GPRS connectivity for remote monitoring and control, and DC input for connecting to solar panels.

Product Overview

High-Efficiency Solar Power Conversion

This 6kW triple-phase solar inverter is a versatile solution designed for both residential and commercial solar energy systems. It features integrated connectivity options including WiFi and GPRS, allowing for seamless remote monitoring and control. Engineered for durability and high performance, this unit ensures reliable energy conversion and long operational lifespan for diverse solar panel configurations.

Technical Specifications

Rated Power Output

6 kW
Power Capacity

Input Compatibility

- Direct Current (DC) Input
- Residential solar arrays
- Commercial solar arrays

Phase Configuration

Triple-Phase

Communication Interfaces

WiFi, GPRS
