Overview

Efficient Waste Collection Solution

This 6m³ garbage compactor truck is engineered for reliable solid waste collection and transport. Featuring a hermetically sealed garbage box and a robust hydraulic system, it efficiently compresses waste to maximize load capacity. The vehicle offers versatile operation via manual or electrical controls and includes a dedicated sink for dirty liquid to prevent environmental pollution.

General Specifications

Capacity

6 m³
Volume

Weight Specifications

Metric	Value
GVW	7,300 kg
Curb Weight	5,100 kg

Overall Dimensions: 6980 x 2050 x 2500 mm

Cab & Comfort

Seating Capacity	3
Air Conditioning	Yes

Engine & Performance

Fuel Type	Diesel
Engine Power	115 HP

Operational Features

Key Operational Benefits

- Hermetically sealed garbage box
- Hydraulic waste compression system
- Integrated waste liquid collection sink
- Complete dumping capability

Control System	Manual Control, Electrical Control
