

6V/12V 1A Slim Smart Battery Charger

This slim, compact smart battery charger is designed for both 6V and 12V batteries, delivering a 1A charging current. The charger features intelligent charging algorithms to optimize battery life and performance, with LED indicators and safety features.

Overview

Smart Charging Technology

The 6V/12V 1A Slim Smart Battery Charger is a compact, high-efficiency solution designed to optimize battery health and performance. Utilizing patented breakthrough technology, this charger offers both manual and automatic voltage selection to accommodate a variety of battery types. It is an ideal maintenance tool for long-term connection, ensuring your batteries remain protected and ready for use.

Technical Specifications

Supported Battery Types

- Lead-acid
- Calcium
- EFB
- AGM

| | |
|-----------------------|---------|
| Charging Current | 1 A |
| Voltage Compatibility | 6V, 12V |
| Ingress Protection | IP65 |

Certifications

Certifications

CE • ROHS • IEC

Features

Key Features

- Fast and powerful charging
- Manual or automatic voltage selection
- Battery repair and health protection
- Maintenance mode for long-term connection
- Slim and compact design
