Product Overview

Professional Battery Charger

This portable battery charger is engineered for reliable performance, supporting both 6V and 12V battery systems. With a maximum output of 10A, it is suitable for a variety of automotive and general-purpose battery charging applications. The unit is designed with safety in mind, featuring built-in overcurrent protection and a manual-reset circuit breaker to ensure durability and operational longevity.

Technical Specifications

Charging Rate Modes

- MIN
- MAX

Maximum Output Current	10 A
Supported Voltages	6V, 12V

Safety & Controls

Protection Mechanisms

Overcurrent Protection • Circuit Breaker

Manual Reset Requirement	Wait at least 3 minutes before manual reset
--------------------------	---

Interface

Control Switches

- On/Off Power Switch
- Voltage Selector (6V/12V)
- Rate Selector (MIN/MAX)

Performance Metrics

10 A

Max Output

12 V

Max Voltage

Charging Monitor

Integrated analog ammeter
