

6W Incandescent Stage Lighting Bulb

The 6W Incandescent Stage Lighting Bulb is a specialized lighting component for stage applications. It provides a warm and consistent illumination, suitable for concerts and theatrical productions, while offering a balance between brightness and energy efficiency.

Overview

Professional Stage Lighting Solution

The 6W Incandescent Stage Lighting Bulb is a specialized component engineered for entertainment and theatrical environments. Designed to deliver warm and consistent illumination, it is an ideal choice for creating specific moods in live performances, concerts, and theatrical productions. Its robust construction ensures reliable performance under demanding conditions, making it an essential tool for lighting designers and technicians.

Technical Specifications

Power Consumption	6 W
Lighting Technology	Incandescent
Application	Stage Lighting, Theatrical Productions, Concerts, Live Performances
Base Type	Standard screw base
