

# 6W RGB White Blue Red Green Underwater LED Boat Light

This 6W underwater LED boat light is designed for marine applications. It features RGB color-changing capabilities, including white, blue, red, and green light options.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Marine Underwater Lighting

This 6W LED underwater boat light is engineered for the demanding marine environment, featuring a robust 316L stainless steel housing and a tempered glass cover. It offers versatile color-changing capabilities including RGB, white, blue, red, and green to enhance both the aesthetics and safety of yachts and boats. Designed for high efficiency and long-term durability, it provides over 50,000 hours of life-span while maintaining low power consumption.

## Technical Specifications

### Power Consumption

**6 W**

Rated Power

|                        |                                                             |
|------------------------|-------------------------------------------------------------|
| Input Voltage          | 12-24V DC                                                   |
| Operational Life-span  | 50000 hours                                                 |
| Integrated Protections | Over-Current, Short-Circuit, Over-Temperature, Over-Voltage |

## Construction & Durability

### Waterproof Rating

IP68

### Resistance Properties

- Corrosion-proof
- Shake-proof
- Rust-proof
- Waterproof

### Housing Material

316L Stainless Steel

### Lens Material

Tempered Glass

## Lighting Performance

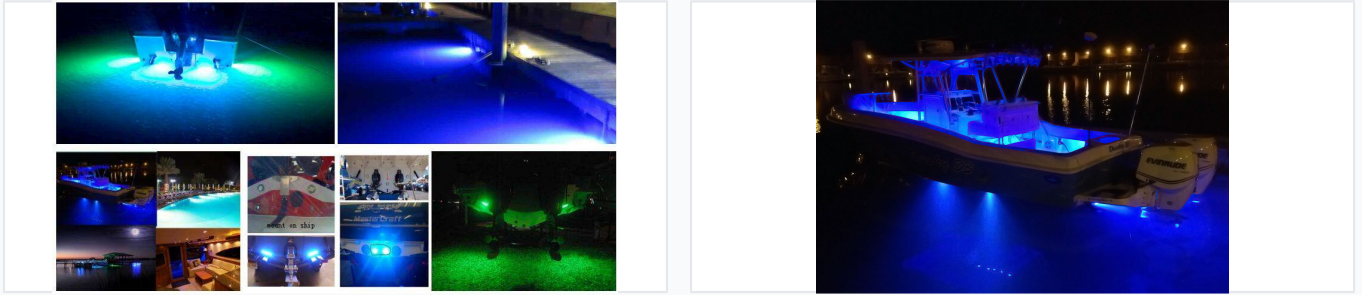

### Available Colors

RGB, White, Blue, Red, Green

### LED Technology

High power LED with heat conducting structure

## Applications

### Recommended Applications

- Yacht and Boat hulls
- Docks and Marinas
- Ponds and Fountains
- Swimming pools

## Commercial Terms

### Business Services

- OEM & ODM Available
- No MOQ / Small Orders Welcomed
- Fast Delivery within 15 Days
