Overview

Heavy-Duty 6x4 Dump Truck

This 6x4 heavy-duty dump truck is engineered for demanding environments such as construction and mining operations. Featuring a robust chassis and a powerful diesel engine, it is designed to transport bulk materials like sand, gravel, and construction debris with high efficiency. With an impressive payload capacity and a durable hydraulic tipping mechanism, this vehicle offers the reliability and performance required for intensive hauling tasks.

Performance & Engine

Engine Specifications

340 hp

Horsepower

8900 ML

Displacement

85 km/h

Max Speed

35 %

Max Grade Ability

Engine Details

Water-cooled 6-cylinder in-line diesel engine with medium cooling and supercharge, compliant with Europe III emission standards.

Dimensions & Capacity

Vehicle Dimensions

Parameter	Value
Overall Dimensions	8690 x 2500 x 3450 mm
Body Internal Dimensions	6000 x 2300 x 1500 mm
Wheelbase	4250 + 1350 mm

Weight Metrics

11955 kg
Equipment Mass

24050 kg
Load Mass

Chassis & Drivetrain

Chassis Specifications

- Clutch: 430mm diaphragm
- Tyre Specification: 12.00-20
- Approach Angle: 30°
- Departure Angle: 20°
- F/R Wheel Base: 2040/1850 mm
- F/R Suspension: 1500/1590 mm
