Overview

Heavy-Duty Fuel Transport Solution

This 6x4 heavy-duty fuel transportation truck is engineered for reliability and efficiency in demanding industrial environments. Featuring a high-capacity 20,000-liter tank constructed from durable Q235 steel, it is built to handle long-haul fuel distribution with stability. The vehicle combines a powerful 336 HP engine with a robust 10-speed transmission, ensuring consistent performance across diverse terrains.

Technical Specifications

Overall Dimensions (L x W x H)	9500 x 2500 x 3210 mm
Wheelbase	4300 + 1350 mm
Wheel Track (Front/Rear)	2020 / 1800 mm

Performance Metrics

Key Performance Metrics

336 HP Engine Power	20000 L Tank Capacity	90 km/h Max Speed
-------------------------------	---------------------------------	-----------------------------

Weight & Capacity

Metric	Value (kg)
Tare Weight	13500
Payload	25000
Front Axle Capacity	7000
Rear Axle Capacity	32000

Engine & Drivetrain

Engine Configuration

- 4-stroke direct injection
- 6-cylinder in-line
- Water cooling
- Turbo-charged and inter-cooled

Transmission	10-speed forward and 2 reverse gear
--------------	-------------------------------------

Fuel Tank Capacity	400 liters
--------------------	------------

Tanker Specifications

Tank Material	Q235 Steel
---------------	------------

Plate Thickness	5mm (Body and End Plate)
-----------------	--------------------------

Support & Warranty

Warranty Policy

The vehicle includes a warranty of one year or 100,000km for on-road usage, or 6 months/60,000km for off-road usage, whichever occurs first. Coverage applies to the engine, gearbox, and axles.

Service Network	240+ Spare Parts Centers, Global Service Outlets, 80+ Countries Covered
