

# 6x4 Refrigerated Truck

This 6x4 refrigerated truck is designed for transporting temperature-sensitive goods. It features a robust chassis, insulated cargo compartment, and a refrigeration unit to maintain optimal temperatures during transit.

## ADDITIONAL IMAGES

## Overview

### High-Performance Refrigerated Logistics

This 6x4 refrigerated truck is engineered for the reliable transport of temperature-sensitive cargo, including food and pharmaceuticals. It features a robust chassis design based on advanced engineering and a high-capacity independent cooling system to ensure consistent climate control during transit. With customizable engine options and heavy-duty braking systems, it is built to handle demanding logistics operations efficiently.

## Dimensions & Capacity

Overall Dimensions	11750 x 2550 x 3800 mm
Wheelbase	5800 + 1400 mm
Fuel Tank Capacity	400 L

## Powertrain

Driving Model	6x4
Horsepower Options	336 hp, 371 hp, 380 hp, 420 hp
Gearbox Configuration	10-speed forward, 2 reverse

## Cooling System

### Cooling Performance

**-20 °C**

Working Temperature

**11.2 KW**

Independent Generator Power

### Refrigeration Details

Feature	Specification
Compressor Displacement	228 cm <sup>3</sup>
Emergency Power Supply	380V/3Ph/50Hz, 4.5kw
Cryogen Capacity	3.9 kg

## Chassis & Components

### Steering Configuration

Left Hand Drive • Right Hand Drive

### Tire Configuration

12R22.5 tubeless (11 pcs including spare)
