

6x4 Refrigerated Truck

This 6x4 refrigerated truck is designed for transporting temperature-sensitive goods. Its refrigeration unit maintains precise temperature control within the cargo area, ensuring the integrity of perishable items during transit.

ADDITIONAL IMAGES

Overview

Professional Cold Chain Logistics

This 6x4 refrigerated truck is engineered for the reliable transport of temperature-sensitive goods, including food and pharmaceuticals. Built on a heavy-duty chassis, it features a high-performance refrigeration unit capable of maintaining temperatures as low as -18°C . The vehicle is designed for long-haul durability and efficient cold chain management, ensuring cargo integrity across diverse road conditions.

Technical Specifications

Engine Power

371 hp

Max Horsepower

Overall Dimensions	11700 x 2500 x 3900 mm
Cargo Body Dimensions	9000 x 2300 x 2300 mm
Body Material	GRP (Glass Reinforced Plastic)
Insulation Thickness	100 mm

Refrigeration System

Minimum Working Temperature	-18°C
Power Supply System	Independent Engine, Standby Power Supply

Service & Warranty

Warranty Coverage

- 1 year or 100,000 km for engine, transmission, and axle
- Spare parts supplied at cost price
- Regular vehicle status callbacks

Production Time

Vehicle Type	Estimated Days
Chassis / Tractor	30-35
Dump / Mixer / Cargo	45-50
Specialized (Crane/Man Lift)	55-60
