

6x6 Articulated Dump Truck for Mining

This 6x6 articulated dump truck is designed for heavy-duty mining operations. It features a robust engine, durable construction, and a high payload capacity for efficient material transport.

Overview

Heavy-Duty Articulated Mining Solution

This 6x6 articulated dump truck is engineered for superior performance in challenging mining environments. Featuring advanced all-terrain self-adaptive driving technology, the vehicle balances high reliability with intelligent operation. It is designed to maximize productivity through powerful performance, low energy consumption, and high operator comfort.

Performance

Engine Power

350 kW

Rated Power

Engine Configuration

- 8-cylinder
- Water-cooled
- V-arranged
- Turbocharged intercooled
- Multi-point electronic injection

Technical Details

Drivetrain

6x6 Articulated

Features

Key Highlights

All-terrain adaptive, High safety, Energy efficient, Easy maintenance, High comfort
