Product Overview

Professional Stainless Steel Cutting

This professional-grade 7-inch abrasive cutting disc is engineered specifically for stainless steel (INOX) applications. It delivers exceptional durability and high working efficiency, ensuring clean, precise cuts with minimal burr formation and reduced heat generation. Designed for industrial use, this disc helps prevent material discoloration and distortion during metal fabrication.

Technical Specifications

Maximum Operating Speed

8490 RPM

Max RPM

80 m/s

Max Velocity

Dimensions

7" x 1/16" x 7/8" (180 x 1.6 x 22.2 mm)

Abrasive Grain Type

WA46TBF

Compliance & Safety

Safety Standards

EN12413

Applications

Compatible Materials

Stainless Steel • INOX • Metal Profiles • Metal Pipes
