

# 7-Inch HEVC Combo Signal Meter

This 7-inch HEVC combo signal meter is designed for analyzing digital television signals. It supports a wide range of standards, including HEVC, and provides comprehensive measurements such as Noise Margin, MER, and BER.

## ADDITIONAL IMAGES

## Overview

### Professional Signal Analysis

This 7-inch HEVC Combo Signal Meter is a professional-grade instrument engineered for the installation and maintenance of satellite, terrestrial, and cable TV systems. It features a high-resolution TFT-LCD display and supports advanced decoding including HEVC (H.265), H.264, and MPEG2 for both SD and HD signals. Designed for field durability and ease of use, it offers comprehensive signal measurement capabilities and a multi-function wheel for efficient navigation.

## Display & Interface

Screen Size	7 inch
Display Type	TFT-LCD
Navigation Method	Multi-function wheel & Keypad

## Signal Performance

DSP Spectrum Range	50-2200
Onscreen Dynamic Range	50 dB
Max Channel Power	120 dBμ
RF Power Supply	5-24V (1V steps)

## Measurement Capabilities

Measurement Metrics	Channel Power, Noise Margin, MER, CBER, VBER, TS Errors, Constellation
---------------------	--

## Decoding & Connectivity

### Connectivity

- Single F Male Connector
- USB
- RS232
- DC 12V

Supported Decoding	HEVC (H.265), H.264, MPEG2, SD, HD
--------------------	------------------------------------

Protocol Support	Diseqc 2.0, SATCR, DCSS
------------------	-------------------------

## Power & Battery

Battery Life	6 hours
--------------	---------
