Product Overview

Professional Segmented Diamond Cutting Disc

This 7-inch segmented diamond cutting disc is engineered for high-performance masonry and construction tasks. The segmented crown design ensures efficient material removal and superior cooling during operation for clean, precise cuts. Designed to be compatible with standard power tools, this tool is an essential asset for professionals requiring durability and reliability on the job site.

Technical Specifications

Maximum Speed

8400 min⁻¹
Max RPM

Diameter	180 mm
Arbor Size	22.2 mm
Model Standards	CTDDPO199, CTDOPO185

Usage

Ideal Applications

- Construction
- Masonry
- Abrasive Cutting
