

7-Inch Submersible Pump

This 7-inch submersible pump is engineered for a variety of uses. The 7TR series includes models with differing power, head, and capacity specifications.

Overview

7TR Series 7-Inch Submersible Pumps

The 7TR Series 7-inch submersible pumps are robust solutions engineered for a wide range of industrial and agricultural water management applications. These high-performance units are available in diverse configurations to suit specific power, head, and capacity requirements. Designed for reliability, the series offers efficient operation at a standard speed of 2850 r/min, ensuring consistent performance across all models.

Technical Specifications

| | |
|------------------------|-----------------------------|
| Operating Speed | 2850 r/min |
| Pump Diameter | 7 inch |
| Available Outlet Sizes | 50 mm, 65 mm, 80 mm, 100 mm |

Model Range

Available Series

- 7TR5
- 7TR10
- 7TR15
- 7TR20
- 7TR25
- 7TR30
- 7TR32
- 7TR35
- 7TR40
- 7TR50
- 7TR63
- 7TR80

Key Performance Indicators

| Series | Typical Outlet (mm) | Efficiency (%) |
|--------|---------------------|----------------|
| 7TR5 | 40 | 53 |
| 7TR10 | 50 | 55 |
| 7TR20 | 50 | 64 |
| 7TR30 | 80 | 67 |
| 7TR50 | 80 | 72 |
| 7TR80 | 100 | 73 |
