Product Overview

Professional Polishing Performance

This 7-inch variable speed corded polisher is engineered for precision and control, making it an ideal choice for automotive detailing and woodworking tasks. It features a robust rotation speed stabilization system that maintains consistent RPMs under load, ensuring a smooth finish on various surfaces. Designed with user comfort in mind, the tool includes a soft-grip handle and a lock-on function for extended operation, while the M14 thread and Velcro fixing system allow for quick and safe accessory changes.
