Product Overview

Professional Towing Connectivity

This 12V 7-pin Australian standard trailer adapter is designed to provide a secure and reliable electrical connection between your vehicle and trailer. Constructed with durable plastic housing and high-quality brass pins, it ensures long-lasting performance and resistance to corrosion even in demanding weather conditions. It serves as an essential component for seamless signal transfer for indicators, brake lights, and side lights, making it ideal for caravans, trucks, RVs, and boat trailers.
