Overview

Precision Grinding Performance

This high-performance grinding wheel is engineered for effective material removal on high-hardness metals, including high-speed steel, high-carbon steel, and hardened alloy steels. Crafted from white aluminum oxide, it provides the durability and consistency required for demanding industrial and metalworking applications. Its versatile design makes it an essential tool for precision grinding tasks.

Dimensions

Dimensions

7 inch

Diameter

0.5 inch

Thickness

1.25 inch

Arbor Hole

Technical Specifications

Abrasive Material	White Aluminum Oxide
Grit Specification	38A46

Applications

Compatible Materials	High-Speed Steel, High Carbon Steel, Hardened Steel, Alloy Steel
----------------------	--

Customization

Available Shapes

- Parallel Cup
- Cup Emery Wheel
- Cylinder
