

7.0 HP Gasoline Engine

This gasoline engine delivers reliable power for various applications. It features durable construction, efficient combustion, an air cleaner, and a fuel tank for extended operation.

Overview

High-Performance 7.0 HP Gasoline Engine

This robust 7.0 HP gasoline engine is engineered for reliable power output in demanding industrial environments. Featuring a durable cast iron cylinder liner and a forged, hardened crankshaft, it is built to withstand rigorous daily use. Designed with an overhead valve (OHV) configuration and automatic compression release, this engine ensures efficient combustion and easy starting for various applications including construction and municipal equipment.

Technical Specifications

Power Output

7 HP

Horsepower

Engine Features

Cast Iron Cylinder Liner, Dual Ball Bearings, Forged Steel Crankshaft, OHV Design

Safety & Compliance

Safety Systems

- Automatic compression release
- Automatic low oil engine shutdown system

Certifications

EPA Emission Certified
