

70-Inch Multi-Touch Security Monitor

This 70-inch security monitor features a full HD display and multi-touch capability. The 450 nit LED panel ensures clear visuals.

Product Overview

Professional Surveillance Display

This 70-inch multi-touch security monitor is engineered for high-stakes surveillance environments, offering a large, high-resolution display for critical monitoring. Designed for continuous operation, the unit features robust components to ensure reliability in demanding 24/7 security applications. It supports multi-image display capabilities, allowing security personnel to view multiple camera feeds simultaneously with exceptional clarity and wide viewing angles.
