

70 m/min Light Keel Roll Forming Machine

This light keel roll forming machine operates at a speed of 70 meters per minute. It is designed for the efficient production of light gauge steel profiles.

Overview

High-Efficiency Light Keel Production

This high-speed roll forming machine is engineered for the efficient, large-scale production of light gauge steel profiles. With a production speed of up to 70 meters per minute, it is designed for consistent precision in manufacturing ceiling keels, drywall studs, and partition components. The system incorporates robust construction, advanced control interfaces, and automated cutting and stacking to maximize productivity while minimizing material waste.

Performance

Production Speed

70 m/min
Max Speed

Capabilities

Supported Profiles

- Omega
- Stud
- Track
- 38 Main
- 50 Furring
- Angle

Technical Features

Key Features

Automatic Cutting, Stacking Capabilities, Precision Tooling, Advanced Control System, Heavy-Duty Frame
