

# 7000W Gasoline Generator with One-Key Start

This gasoline generator delivers 7000W of running power and 8750W of starting power. It features a one-key start system and is equipped with a 12V 17Ah battery.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Gasoline Generator

This versatile gasoline generator is engineered for both residential and commercial power needs, offering reliable energy output with options ranging from 5kW to 7kW. Designed for convenience, it features a one-key electric start system and a robust 12V 17Ah battery for dependable operation. Built with high-quality components and an advanced air filtration system, this unit ensures durability and consistent performance in various environments.
