

700CX18 Road Bicycle with Aluminum Alloy Frame

This 700CX18 road bicycle has a high-strength aluminum alloy frame. Its transmission system includes SL-KD-08, FD-QD-02, and RD-04A components.

Overview

High-Performance Road Cycling

This road bicycle is engineered for both recreational and competitive cycling, featuring a lightweight alloy frame that ensures efficient power transfer and responsive handling. The aerodynamic design is optimized to minimize wind resistance, helping riders achieve greater speeds with less effort. With a geometry focused on comfort and stability, it is an ideal choice for long-distance rides and challenging routes.

Technical Specifications

Wheel Size	700C
Frame Material	Aluminum Alloy
Drivetrain System	Shimano

Key Features

Performance Highlights

1 Optimized
